

Multiple table queries with Dreamhouse.

1. Can you write the query which lists the renters that are looking for a house?

```
SELECT Fname, Lname, Pref_Type
FROM Renter
WHERE Pref_Type='house';
```

2. Can you write the query which finds the number of properties registered at branch B5 and B3?

```
SELECT COUNT (Bno)
FROM property_for_rent
WHERE BNO = 'B3' OR 'B5';
```

3. Can you write the query which finds all the managers who receives more than the average salary?

```
SELECT fname& " ", LName AS [Manager name], bno, salary
FROM Staff
WHERE Salary > (Select avg (Salary) FROM Staff)
ORDER BY Salary Desc;
```

4. Can you write the query which finds all branches that employ female assistants?

```
SELECT sno, fname& " ", LName as [Staff Name], Position, Salary, bno
FROM Staff
WHERE Position LIKE '*Ass*' AND sex = 'F';
```
